

Thank you for visiting our website!

I hope your visit to GCH Tool Group Website is helpful and informative.

GCH is committed to our customers and their production needs. We continue to solve problems faced by the grinding industry. For instance, GCH has broadened its scope to provide turnkey retrofits and replacement components. We learned from our customers that they needed fast replacement components, from system design to installation to commissioning.

The market we serve is worldwide and ever changing. To succeed, we have learned to be on top of the issues and to respond quickly. The challenges of recent years have been enormous – rising costs for raw materials and escalating energy prices are at the top of the list. Our goal is to serve as a neutralizing agent to manufacturers that use grinding equipment. Remanufacturing of components reduce cost to the end user and revitalizes old grinding equipment, saving our customers time and money.

While we maintain and build our expertise in grinding machine tools, GCH leadership is seeking other ways to improve the grinding rebuild market. We are expanding our product portfolio to include CNC retrofits, new component upgrade options, and new technological advances in grinding machine tools. And we are partnering with respected equipment manufacturers in bringing their products and technology to the marketplace.

Our dedication to the GLOBAL market will continue for decades and beyond. I'm proud of the work our employees are doing in this business to continue innovating and learning. Thank you for your interest in GCH and for your efforts and cooperation in working with us now and into the future.

Sincerely,
